* The credit quality breakdown depicts the credit quality ratings of the Fund's portfolio securities that are rated by one or both of two major nationally recognized statistical rating organizations ("NRSRO"). The two NRSROs currently utilized are Standard & Poor's (S&P) and Moody's. When a bond is rated by S&P that rating is utilized. If it is not rated by S&P, the Moody's rating is utilized. When a security is rated by neither, it is classified as "Not Rated". For bonds, these credit quality ratings are shown without regard to gradations within a given rating category. For example, securities rated "AA-" or "AA+" have been included in the "AA" rated category. Long-term ratings are measured on a scale that generally ranges from AAA (highest) to D (lowest). Short-term ratings are generally assigned to those obligations considered short-term in the relevant market. They are rated on a scale from A1 to A3.
