

City National Rochdale Fixed Income Opportunities Fund

a series of City National Rochdale Funds

SUMMARY PROSPECTUS DATED JANUARY 31, 2017

Class:
Class N

Ticker:
(RIMOX)

Before you invest, you may want to review the Fund's Prospectus, which contains more information about the Fund and its risks. You can find the Fund's Prospectus and other information about the Fund, including the Fund's Statement of Additional Information and shareholder reports, online at <http://www.citynationalrochdalefunds.com>. You can also get this information at no cost by calling (888) 889-0799 or by sending an e-mail request to citynationalrochdale@seic.com or from your financial intermediary. The Fund's Prospectus and Statement of Additional Information, dated January 31, 2017, as may be amended or further supplemented, and the independent registered public accounting firm's report and financial statements in the Fund's Annual Report to shareholders, dated September 30, 2016, are incorporated by reference into this Summary Prospectus.

City National Rochdale Fixed Income Opportunities Fund

INVESTMENT GOAL

The City National Rochdale Fixed Income Opportunities Fund (the “Fixed Income Opportunities Fund” or the “Fund”) seeks a high level of current income.

FEES AND EXPENSES OF THE FUND

The table below describes the fees and expenses you may pay if you buy and hold shares of the Fixed Income Opportunities Fund.

Annual Fund Operating Expenses

(expenses that you pay each year as a percentage of the value of your investment)

| | Class N |
|--------------------------------------|---------|
| Management Fees | 0.50% |
| Distribution (12b-1) Fee | 0.25% |
| Other Expenses | |
| Shareholder Servicing Fee | 0.25% |
| Other Fund Expenses | 0.10% |
| Total Other Expenses | 0.35% |
| Total Annual Fund Operating Expenses | 1.10% |

EXAMPLE

This Example is intended to help you compare the cost of investing in the Fixed Income Opportunities Fund with the cost of investing in other mutual funds.

The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

| | 1 Year | 3 Years | 5 Years | 10 Years |
|---------|--------|---------|---------|----------|
| Class N | \$ 112 | \$ 350 | \$ 606 | \$ 1,340 |

PORTFOLIO TURNOVER

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During its most recent fiscal year, the portfolio turnover rate of the Fund was 124% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

Under normal conditions, the Fund invests at least 80% of its net assets (plus any borrowing for investment purposes) in fixed income securities. The Fund invests in both fixed rate and floating rate fixed income securities and may invest in fixed income securities of any credit rating. The Fund seeks to invest its net assets opportunistically across a broad spectrum of income yielding securities. The Fund expects to have exposure to high yield bonds (commonly known as “junk” bonds), first- and second-lien senior floating rate loans and other floating rate debt securities, bonds issued by sovereign issuers or quasi-sovereign issuers (i.e., entities that are fully guaranteed, or 100% directly or indirectly owned or controlled, by sovereign entities), and domestic and foreign corporate bonds including asset-backed securities, bank loans and trust preferred securities. The Fund’s portfolio managers determine the portion of the Fund’s assets invested in each income-based asset class. The Fund’s foreign investments include investments in companies that are operating principally in emerging market or frontier market countries. The Fund considers a company to be operating principally in an emerging market or frontier market if (i) the company is incorporated or has its principal business activities in such a market or (ii) the company derives 50% or more of its revenues from, or has 50% or more of its assets in, such a market. The Fund considers a country to be an emerging market country if it has been determined by an international organization, such as the World Bank, to have a low to middle income economy. The Fund considers a country to be a frontier market country if it is included in the MSCI Frontier Markets Index.

The Fund also invests in other income-producing securities consisting of preferred stocks, high dividend paying stocks, securities issued by other investment companies (including exchange traded funds (“ETFs”) and money market funds), and money market instruments. Up to 100% of the Fund’s assets may be held in instruments that are rated below investment grade by either by Standard & Poor’s Ratings Services (“Standard & Poor’s”) or Moody’s Investors Service, Inc. (“Moody’s”), or in unrated securities determined by City National Rochdale, LLC (the “Adviser”), the Fund’s investment adviser, or a Fund sub-adviser to be of equal quality. Although the Adviser and sub-advisers may consider credit ratings in selecting investments for the Fund, the Adviser and the sub-advisers generally base their investment decisions for a particular instrument primarily on their own credit analyses and not on a credit rating by a nationally recognized statistical rating organization. The Adviser and sub-advisers generally consider, among other things, the issuer’s financial resources and operating history, its sensitivity to economic conditions and trends, its debt maturity schedules and borrowing requirements, and relative values based on anticipated cash flow, interest and asset coverage. The Fund may invest in income producing securities and other instruments without regard to the maturity of any instrument or the average maturity or duration of the Fund as a whole.

The Fund may also invest up to 15% of its net assets in life insurance policies (“Policies”) and interests related thereto purchased through life settlement transactions. In connection with such an investment a Policy owner transfers his or her Policy at a discount to its face value (the amount that is payable upon the death of the insured) in return for an immediate cash settlement. The ultimate purchaser of the Policy (in this case, the Fund) is responsible for premiums payable on the Policy and is entitled to receive the full face value from the insurance company upon the death of the insured. The Fund may invest in life insurance policies and related interests directly or through a wholly owned subsidiary of the Fund organized under the laws of Ireland (the “Irish Subsidiary”). The Fund generally gains exposure to Policies through the Irish Subsidiary.

In selecting the Fund’s investments, the Adviser or the relevant sub-adviser analyzes an issuer’s financial condition, business product strength, competitive position and management experience. The Fund may continue to own a security as long as the dividend or interest yields satisfy the Fund’s objective, the credit quality meets the Adviser’s or sub-adviser’s fundamental criteria and the Adviser or sub-adviser believes the valuation is attractive and industry trends remain favorable. Generally, in determining whether to sell a security, the Adviser or relevant sub-adviser uses the same type of analysis that it uses when buying securities to determine whether the security continues to be a desirable investment for the Fund, including consideration of the security’s current credit quality. The Adviser or sub-adviser may also sell a security to reduce the Fund’s holding in that security, to take advantage of what it believes are more attractive investment opportunities or to raise cash.

PRINCIPAL RISKS OF INVESTING IN THE FUND

As with any mutual fund, there are risks to investing. None of the Fixed Income Opportunities Fund, the Adviser or the sub-advisers can guarantee that the Fund will meet its investment goal. The Fund will expose you to risks that could cause you to lose money. Here are the principal risks to consider:

The Effect of Interest Rates – The Fund’s yield typically moves in the same direction as movements in short-term interest rates, although it does not do so as quickly.

Market Risk of Fixed Income Securities – The prices of fixed income securities respond to economic developments, particularly interest rate changes, as well as to perceptions about the creditworthiness of individual issuers, including governments. Generally, fixed income securities decrease in value if interest rates rise and increase in value if interest rates fall, with lower rated and longer-maturity securities more volatile than higher rated and shorter-maturity securities. Additionally, especially during periods of declining interest rates, borrowers may pay back principal before the scheduled due date, requiring the Fund to replace a particular loan or bond with another, lower-yield security.

Issuers – The Fund may be adversely affected if the issuers of securities that the Fund holds do not make their principal or interest payments on time.

Market Risk of Equity Securities – By investing directly or indirectly in stocks, the Fund may expose you to a sudden decline in the share price of a particular portfolio holding or to an overall decline in the stock market. In addition, the Fund's principal market segment may underperform other segments or the market as a whole. The value of your investment in the Fund will fluctuate daily and cyclically based on movements in the stock market and the activities of individual companies in the Fund's portfolio. Common stocks are susceptible to general stock market fluctuations and to volatile increases and decreases in value as market confidence in and perceptions of their issuers change. Preferred stock is subject to the risk that the dividend on the stock may be changed or omitted by the issuer, and that participation in the growth of the issuer may be limited. Preferred stock typically has "preference" over common stock in the payment of distributions and the liquidation of a company's assets, but is subordinated to bonds and other debt instruments. In addition, preferred stock holders generally do not have voting rights with respect to the issuing company.

Credit – Changes in the credit quality rating of a security or changes in an issuer's financial condition can affect the Fund. A default on a security held by the Fund could cause the value of your investment in the Fund to decline. Investments in lower rated bank loans and lower rated debt securities involve higher credit risks. There is a relatively higher risk that the issuer of such loans or debt securities will fail to make timely payments of interest or principal, or go bankrupt. Credit risk may be high for the Fund because it invests in lower rated investment quality fixed income securities.

Prepayments – As a general rule, prepayments of principal of loans underlying asset-backed or other pass-through securities increase during a period of falling interest rates and decrease during a period of rising interest rates. In periods of declining interest rates, as a result of prepayments the Fund may be required to reinvest its assets in securities with lower interest rates. In periods of increasing interest rates, the securities subject to prepayment risk held by the Fund may exhibit price characteristics of longer-term debt securities.

Extension – Rising interest rates can cause the average maturity of the Fund's holdings of asset-backed and other pass-through securities to lengthen unexpectedly due to a drop in prepayments. This would increase the sensitivity of the Fund to rising rates and the potential for price declines of portfolio securities.

Liquidity – Bank loans, high yield bonds, floating rate securities and lower rated securities may experience illiquidity, particularly during certain periods of financial or economic distress, causing the value of the Fund's investments to decline. It may be more difficult for the Fund to sell its investments when illiquid or the Fund may receive less than it expects to receive if the security were sold. Additionally, one or more of the instruments in which the Fund invests may be permanently illiquid in nature and market prices for these instruments are unlikely to be readily available at any time. In the absence of readily available market prices or, as is expected to be the case for certain illiquid asset-backed investments, the absence of any pricing service or observable pricing inputs, the valuation process will depend on the evaluation of factors such as prevailing interest rates, creditworthiness of the issuer, the relative value of the cash flows represented by the underlying assets and other factors. The sales price the Fund may receive for an illiquid security may differ from the Fund's valuation of the illiquid security.

Foreign Securities – Investments in securities of foreign issuers tend to be more volatile than domestic securities, and are subject to risks that are not typically associated with domestic securities (e.g., changes in currency rates and exchange control regulations, unfavorable political and economic developments and the possibility of seizure or nationalization of companies, or the imposition of withholding taxes on income). There may be less government supervision of foreign markets. As a result, foreign issuers may not be subject to the uniform accounting, auditing, and financial reporting standards and practices applicable to domestic issuers, and there may be less publicly available information about foreign issuers.

Emerging Markets Securities – Many of the risks with respect to foreign securities are more pronounced for investments in developing or emerging market countries. Emerging market countries may have government exchange controls, more volatile currency exchange rates, less market regulation, and less developed securities markets and legal systems. Their economies also depend heavily upon international trade and may be adversely affected by protective trade barriers and economic conditions of their trading partners.

Frontier Markets Securities – Frontier market countries are a sub-set of emerging market countries the capital markets of which are less developed, generally less liquid and have lower market capitalization than those of the more developed, "traditional" emerging markets but which still demonstrate a relative market openness to and accessibility for foreign investors. Frontier market countries generally have smaller economies and even less developed capital markets with relatively newer and less tested regulatory and legal systems than traditional emerging markets, and, as a result, the risks discussed above with respect to emerging markets are magnified in frontier market countries. Securities issued by borrowers in frontier market countries are often subject to extreme price volatility and illiquidity and effects stemming from government ownership or control of parts of private sector and of certain companies; trade barriers, exchange controls, managed adjustments in relative currency values and other protectionist measures imposed or negotiated by the countries with which frontier market countries trade; and relatively new and unsettled securities laws.

Financial Services Firms – The Fund invests in obligations of financial services firms, including those of banks. Changes in economic conditions and government regulations can significantly affect these issuers.

Volatility – Because of the speculative nature of the income securities in which the Fund invests, the Fund may fluctuate in price more than other bond and income funds.

High Yield (“Junk”) Bonds – High yield bonds involve greater risks of default, downgrade, or price declines and are more volatile than investment grade securities. Issuers of high yield bonds may be more susceptible than other issuers to economic downturns and are subject to a greater risk that the issuer may not be able to pay interest or dividends and ultimately to repay principal upon maturity. Discontinuation of these payments could have a substantial adverse effect on the market value of the security.

Bank Loans – The Fund may invest in U.S. and non-U.S. bank loans. Bank loans are not traded on an exchange and purchasers and sellers of bank loans generally rely on market makers, typically the administrative agent under a bank loan, to effect private sales transactions. As a result bank loans may have relatively less liquidity than other types of fixed income assets, and the Fund may be more likely to incur losses on the sale of bank loans than on other, more liquid, investments.

Loan instruments may not be readily marketable and may be subject to restrictions on resale. In some cases, negotiations involved in disposing of loans may require weeks to complete. Thus, transactions in loan instruments may take longer than seven days to settle. This could pose a liquidity risk to the Fund and, if the Fund’s exposure to such investments is substantial, could impair the Fund’s ability to meet shareholder redemptions in a timely manner.

The Fund’s investments in non-U.S. bank loans are subject to additional risks including future unfavorable political and economic developments, possible withholding taxes on interest income, seizure or nationalization of foreign deposits, currency controls, interest limitations, or other governmental restrictions which might affect the payment of principal or interest on the bank loans held by the Fund.

Underlying Funds – To the extent the Fund invests in other funds, the risks associated with investing in the Fund are closely related to the risks associated with the securities and other investments held by the underlying funds. The ability of the Fund to achieve its investment goal depends in part upon the ability of the underlying funds to achieve their investment goals. The underlying funds may not achieve their investment goals. In addition, by investing in the Fund, shareholders indirectly bear fees and expenses charged by the underlying funds in addition to the Fund’s direct fees and expenses.

ETFs – ETFs typically trade on securities exchanges and their shares may, at times, trade at a premium or discount to their net asset values. In addition, an ETF may not replicate exactly the performance of the benchmark index or group of indices it seeks to track for a number of reasons, including transaction costs incurred by the ETF, the temporary unavailability of certain index securities in the secondary market or discrepancies between the ETF and the index with respect to the weighting of securities or the number of securities held.

By investing in the Fund, shareholders indirectly bear fees and expenses charged by the ETFs in which the Fund invests, in addition to the Fund’s direct fees and expenses.

Life Insurance Policies – If the Fund is unable to make premium payments on a Policy, the Policy will lapse and the Fund will lose its ownership interest in the Policy. There is currently no established secondary market for Policies, and the Policies are not considered liquid investments by the Fund. If the Fund must sell Policies to meet redemption requests or other cash needs, the Fund may be forced to sell at a loss. In addition, market quotations will not be readily available for the Policies and the Policies will be priced using a fair value methodology adopted by the Trust’s Board. The sales price the Fund could receive for a Policy may differ from the Trust’s valuation of the Policy. There may be a mismatch of cash flows related to the Fund’s investment in Policies (e.g., the Irish Subsidiary may not take in enough new investment and death benefits paid on maturing life settlements to cover premium payments on existing Policies held by the Irish Subsidiary). The longer the insured lives, the lower the Fund’s rate of return on the related Policy will be. The underwriter’s estimate of the insured’s life expectancy may be incorrect. An insurance company may be unable or refuse to pay benefits on a Policy. In addition, the heirs of an insured may challenge the life insurance settlement. Although the Fund intends to only purchase Policies for which the applicable contestability period has expired, it is possible that a Policy may be subject to contest by the insurance company. A Policy is a liability of the issuing life insurance company, and if the life insurance company goes out of business, sufficient funds may not be available to pay that liability.

Risk of Investment through the Irish Subsidiary – The Fund may invest in Policies by investing in the Irish Subsidiary. The Irish Subsidiary is not an investment company registered under the Investment Company Act of 1940, as amended (the “1940 Act”), and unless otherwise noted in this Prospectus and the SAI, is not subject to all of the investor protections of the 1940 Act and other U.S. regulations. Changes in the laws of the United States and/or Ireland could affect the ability of the Fund and/or the Irish Subsidiary to operate as described in this Prospectus and the SAI and could negatively affect the Fund and its shareholders. The Irish Subsidiary (unlike the Fund) may invest an unlimited portion of its net assets in Policies. However, the Irish Subsidiary otherwise is subject to the Fund’s investment restrictions and other policies.

Tax Matters – To qualify for treatment as a regulated investment company (“RIC”) under the Internal Revenue Code of 1986, as amended (the “Code”), the Fund must meet certain requirements including requirements regarding the composition of its income. Any income the Fund derives from direct investments in Policies may be considered non-qualifying income and must be limited, along with investments in any other non-qualifying sources, to a maximum of 10% of the Fund’s gross income in any fiscal year. In addition, the Fund may invest in Policies through the Irish Subsidiary. The Irish Subsidiary is treated as a “controlled foreign corporation” (a “CFC”) for U.S. federal income tax purposes. The Fund has obtained an opinion of counsel, based on representations from the Fund and the Irish Subsidiary, that actual distributions made to the Fund by the Irish Subsidiary will, more likely than not, be treated as qualifying income. Under proposed Treasury

Regulations issued in September 2016, certain income derived by a RIC from a CFC would generally constitute “qualifying income” only to the extent the CFC makes distributions to the RIC out of the CFC’s earnings and profits attributable to that income. The Irish Subsidiary intends to make all necessary distributions such that the Fund’s income derived from the Irish Subsidiary will constitute qualifying income. As a result either of direct investments in Policies or of investments through the Irish Subsidiary, the Fund might generate more non-qualifying income than anticipated, might not be able to generate qualifying income in a particular fiscal year at levels sufficient to limit its non-qualifying income to 10% of the Fund’s gross income, or might not be able to determine the percentage of qualifying income it derives for a taxable year until after year-end. If the Fund fails to meet this 10% requirement, the Fund might not be eligible for treatment as a RIC, in which case it would be subject to federal income tax on its net income at corporate rates. Alternatively, if the Fund fails to meet the 10% requirement, the Fund might be able to pay a tax equal to the amount of the non-qualifying income to the extent it exceeds one-ninth of the Fund’s qualifying income. The tax treatment of the Policies and the Fund’s investments in the Irish Subsidiary may be adversely affected by future legislation, Treasury Regulations and/or guidance issued by the IRS that could, among other things, affect the character, timing and/or amount of the Fund’s taxable income or gains and of distributions made by the Fund.

Irish Subsidiary Tax Matters – Under current IRS guidance, Policy proceeds paid by a U.S. insurance company to a foreign corporation such as the Irish Subsidiary are generally subject to U.S. federal income tax withholding at a 30% rate. The Irish Subsidiary intends to qualify for benefits under the U.S.-Ireland income tax treaty which would include an exemption from such withholding. There is a risk, however, that a U.S. insurance company issuer may not respect the claimed treaty benefits and may withhold the 30% tax on the proceeds paid to the Irish Subsidiary. In such a case, the Irish Subsidiary may be able to obtain a refund from the IRS.

Any changes to the U.S.-Ireland tax treaty, U.S. or Ireland law, or the manner in which the treaty and such laws are applied to the Irish Subsidiary or the Fund, may have an adverse tax effect on the Irish Subsidiary, the Fund and its shareholders.

Rating Agencies – A credit rating is not an absolute standard of quality, but rather a general indicator that reflects only the views of the originating rating agency. If a rating agency revises downward or withdraws its rating of a security in which the Fund invests, that security may become less liquid or may lose value.

Management – The Fund’s performance depends on the Adviser’s and sub-advisers’ skill in making appropriate investments. As a result the Fund may underperform the markets in which it invests or similar funds.

Sub-Adviser Allocation – The Fund’s performance is affected by the Adviser’s decisions concerning how much of the Fund’s portfolio to allocate for management by each of the Fund’s sub-advisers or to retain for management by the Adviser.

Redemptions – The Fund may experience heavy redemptions, particularly during periods of declining or illiquid markets, that could cause the Fund to liquidate its assets at inopportune times or at a loss or depressed value. Redemption risk is greater to the extent that the Fund has investors with large shareholdings, short investment horizons, or unpredictable cash flow needs.

Defensive Investments – During unusual economic or market conditions, or for temporary defensive or liquidity purposes, the Fund may invest up to 100% of its assets in cash or cash equivalents that would not ordinarily be consistent with the Fund’s investment goal.

An investment in the Fund is not a deposit of City National Bank or Royal Bank of Canada and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

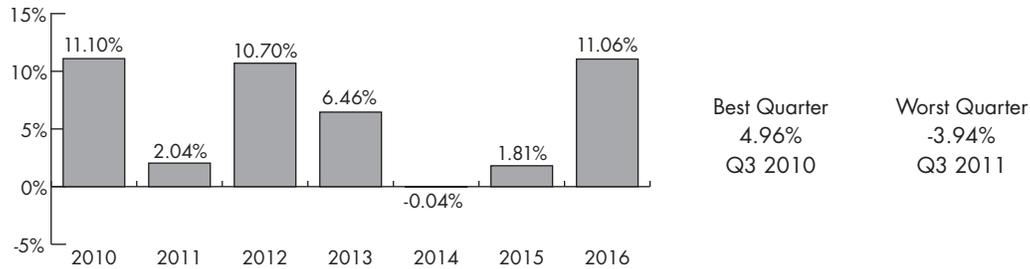

PERFORMANCE

The Fund’s predecessor, the Rochdale Fixed Income Opportunities Portfolio, commenced operations on July 1, 2009, as a series of Rochdale Investment Trust, a Delaware statutory trust (the “Predecessor Fund”). The Fixed Income Opportunities Fund commenced operations on March 29, 2013, and offered shares of the Fund for public sale on April 1, 2013, after the reorganization of the Predecessor Fund into the Fixed Income Opportunities Fund. The Fund has adopted an investment objective and investment strategies and policies substantially similar to those of the Predecessor Fund.

The bar chart and the performance table that follow illustrate some of the risks and volatility of an investment in the Fixed Income Opportunities Fund by showing the changes in the Fund’s performance from year to year and by showing the Fund’s average annual total returns for the indicated periods. Of course, the Fund’s past performance does not necessarily indicate how the Fixed Income Opportunities Fund will perform in the future. Updated performance is available by calling 1-888-889-0799.

In the bar chart and the performance table, the performance results prior to March 29, 2013, are for the Predecessor Fund. Class N shares of the Fixed Income Opportunities Fund and the Predecessor Fund shares would have substantially similar annual returns because the shares are invested in the same portfolio of securities. Unless otherwise indicated, the bar chart and the performance table assume reinvestment of dividends and distributions.

This bar chart shows the performance of the Fixed Income Opportunities Fund's Class N shares based on a calendar year.

This table shows the average annual total returns of each class of the Fixed Income Opportunities Fund for the periods ended December 31, 2016. The table also shows how the Fund's performance compares with the returns of indexes comprised of investments similar to those held by the Fund.

Average Annual Total Returns

| (for the periods ended December 31, 2016) | One Year | Five Years | Since Inception (7/1/2009) |
|--|----------|------------|-------------------------------|
| Class N⁽¹⁾ | | | |
| Return Before Taxes | 11.06% | 5.90% | 6.82% |
| Return After Taxes on Distributions | 8.38% | 3.35% | 4.34% |
| Return After Taxes on Distributions and Sale of Fund Shares | 6.41% | 3.46% | 4.31% |
| Credit Suisse Leveraged Loan Index (Reflects no deduction for fees, expenses or taxes) | 9.87% | 5.34% | 6.45% |
| Bloomberg Barclays U.S. Aggregate Bond Index (Reflects no deduction for fees, expenses or taxes) | 2.65% | 2.23% | 3.74% |
| Bloomberg Barclays U.S. Corporate High Yield Bond Index (Reflects no deduction for fees, expenses or taxes) | 17.13% | 7.36% | 9.58% |

⁽¹⁾ Performance shown for periods prior to March 29, 2013, reflects that of the Predecessor Fund's Class N shares.

After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. The after-tax returns shown are not relevant to investors who hold their Fund shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts.

INVESTMENT MANAGER

City National Rochdale, LLC

SUB-ADVISERS

Seix Investment Advisors LLC

Federated Investment Management Company

GML Capital LLP

Alcentra Limited

Ashmore Investment Management Limited

AllFinancial Partners II, LLC

PORTFOLIO MANAGERS

Garrett D'Alessandro, the Adviser's President and Chief Executive Officer, has served as portfolio manager for the Fund since May 2016. William C. Miller, Jr., Senior Vice President and Director – Fixed Income Investments of the Adviser, has served as a portfolio manager of the Fund since 2013. George Goudelias, Senior Portfolio Manager and Head of Leveraged Finance of Seix Investment Advisors LLC, and Mark E. Durbiano, a Senior Vice President, Senior Portfolio Manager, Head of Domestic High Yield Group, and Head of Bond Sector Pod/Committee of Federated Investment Management Company, have each managed a portion of the Fund and Predecessor Fund since the inception of the Predecessor Fund in 2009. Stefan Pinter, Chief Executive Officer and Chief Investment Officer of GML Capital LLP, and Theodore Stohner and Maxim Matveev, Portfolio Managers of GML Capital LLP, have as a team managed a portion of the Fund and the Predecessor Fund since 2011. Graham Rainbow, European Loan Portfolio Manager of Alcentra Limited, has managed a portion of the Fund since 2014. Ashmore Investment Management Limited (“Ashmore”) has a collective, team-based approach to investment management and its Ashmore Investment Committee has, as a team, managed a portion of the Fund since 2014. The members of the Investment Committee are Mark Coombs, Chief Executive Officer of Ashmore, Herbert Saller, Senior Portfolio Manager and Head of External Debt at Ashmore, Ricardo Xavier, Senior Portfolio Manager and Head of Local Currency at Ashmore, and Robin Forrest, Senior Portfolio Manager and Head of Corporate Debt at Ashmore. Michael Krasnerman, Chief Executive Officer and portfolio manager of AllFinancial Partners II, LLC, has managed a portion of the Fund since 2014.

PURCHASE AND SALE OF FUND SHARES

The Class N shares of the Fund are available to individual investors, partnerships, corporations and other accounts and certain tax-deferred retirement plans (including 401(k) plans, employer-sponsored 403(b) plans, 457 plans, profit sharing and money purchase pension plans, defined benefit plans and non-qualified deferred compensation plans) held in plan level or omnibus accounts. Shares of the Fixed Income Opportunities Fund may be purchased, redeemed or exchanged through the Fund's transfer agent or through an approved broker-dealer or other financial institution (each an “Authorized Institution”). There are no minimum purchase or minimum shareholder account balance requirements for Class N shares of the Fund; however, you will have to comply with any purchase and account balance minimums of your Authorized Institution. The Fund may require each Authorized Institution to meet certain aggregate investment levels before it may open an account with the Fund on behalf of its customers. Contact your Authorized Institution for more information.

The shares of the Fixed Income Opportunities Fund are redeemable on any day that the NYSE is open for business. Contact the Fund's transfer agent at 1-866-209-1967 or your Authorized Institution for instructions on how you may redeem or exchange shares of the Fund. Your Authorized Institution may charge a fee for its services, in addition to the fees charged by the Fund.

TAX INFORMATION

The Fixed Income Opportunities Fund intends to make distributions that may be taxed as ordinary income or capital gains.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

If you purchase the Fixed Income Opportunities Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's web site for more information.
